Objective

Full Stack Developer (B.E. Computer Engineering) specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). Experienced in designing responsive web applications, building scalable RESTful APIs, and implementing CI/CD pipelines. Agile-driven and passionate about writing clean, reusable code to deliver high-performance, secure software solutions.

Projects

MedEcho (Full Stack Application) | *React.js, Node.js, Express.js, MongoDB, HTML/CSS* **Live Demo**

- Built a responsive UI/UX using React.js and HTML/CSS, ensuring seamless cross-browser compatibility and application performance.
- Developed and integrated scalable RESTful APIs using Node.js and Express.js to process unstructured data and support frontend functionality.
- Authored and maintained comprehensive documentation for system architecture and API endpoints to improve team collaboration.

Automated CI/CD & Code Quality Pipeline | *Git, GitHub Actions, CI/CD, Python* **Live Demo | GitHub**

- Implemented robust CI/CD pipelines to automate testing, continuous integration, and continuous deployment workflows.
- Managed version control via Git and conducted automated code reviews/debugging to identify defects and optimize application scalability.
- Resolved defects and executed performance optimization checks, maintaining high code quality across full-stack environments.

Enterprise ReferralBot (API Integrations) | *Node.js, Cloud Functions, Microservices* **GitHub**

- Engineered secure backend components and API microservices to automate complex data routing and business logic.
- Collaborated effectively to define requirements, optimizing system security and backend speed to deliver features on schedule.

Skills

Full Stack & MERN: JavaScript (ES6+), React.js, Node.js, Express.js, HTML/CSS, Responsive UI/UX
Databases & APIs: MongoDB, RESTful APIs, Microservices Integration, PostgreSQL, SQL
DevOps & Tools: Git, CI/CD Pipelines, GitHub Actions, System Architecture, Postman
Methodologies & Concepts: Agile Development, Code Debugging, Performance Optimization, Secure Architecture

Experience

Mira Advanced Engineering **Jan 2024 – Feb 2024**
MERN Stack Development Intern *Mumbai, Maharashtra*

- Designed, developed, and maintained responsive front-end components and robust back-end APIs using React.js, Node.js, and Express.js.
- Integrated MongoDB and MySQL databases to support core application functionality, writing clean and reusable JavaScript code.
- Collaborated with teams in an Agile environment, managing version control with Git and troubleshooting defects to improve code quality.

Education

Marathwada Mitra Mandal's Institute Of Technology, Pune **Graduated 2025**
Bachelor of Engineering (B.E.) in Computer Engineering *CGPA: 7.65/10*

Certifications & Achievements

- **Full Stack Development Focus:** Strong foundation in JavaScript frameworks, UI/UX implementation, and backend integration.
- **Oracle Certified Foundations Associate:** Agentic AI Certified Foundations Associate (Valid Aug 2026 – Aug 2028).
- **Bug Bounty Competition: Winner** of the campus-wide Bug Bounty Competition (focusing on system debugging, security, and troubleshooting defects).
